PROFESSIONAL PROFILE

Full Stack Developer with experience in the development, maintenance, and evolution of **enterprise ERP systems**. Active participation in the entire software lifecycle, from design to implementation and support.

Specialized in full stack development with .NET and building modern interfaces with React, focused on process optimization, system integration, and performance improvement. Experience working with complex business logic, APIs, and database management, ensuring stability, scalability, and efficiency in critical applications.

Ability to take on end-to-end responsibilities and provide technical solutions aligned with business objectives.

PROFESSIONAL EXPERIENCE

Programmer Analyst

Ethical Pharmaceutical · 2022 – 2025 ~ Dominican Republic

- Development and maintenance of enterprise ERP system.
- Implementation of business logic and backend services using C# and ASP.NET (.NET Core).
- Design and integration of APIs for communication between modules and internal systems.
- Development of user interfaces using Vue, focused on functionality and user experience.
- Management, querying, and optimization of SQL Server databases.
